

User Testimonial Testwell CTC++

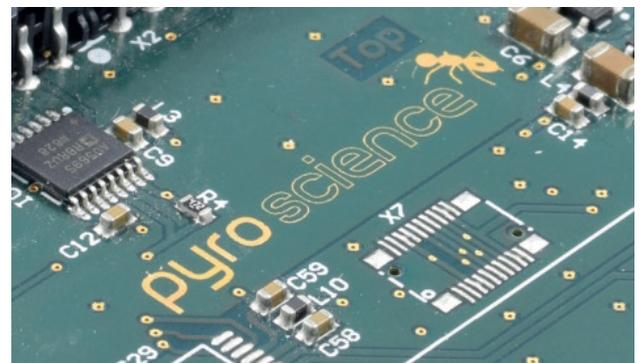

PyroScience GmbH

PyroScience GmbH is one of the world's leading suppliers of state-of-the-art optical pH, O₂, and temperature measurement technology for industrial and scientific applications, which is used in particular in the growth markets of environmental science, life sciences, biotechnology, and medical technology. The areas of application range from deep-sea research to space exploration.

The PyroScience GmbH was founded in 2011 and has since shown organic growth of 10-20% annually.

At both locations in Aachen (Germany) and Graz (Austria), a large part of the resources is invested in the development teams in order to continuously develop new innovative solutions.

We use Testwell CTC++ as part of our IEC 61508 compliant development workflow, and it has proven to be an excellent choice. Since Testwell CTC++ is certified for IEC 61508, it gives us confidence that our verification process meets the required functional safety standards. With Testwell CTC++, we are able to achieve and clearly demonstrate the desired level of test coverage required for our safety targets. The coverage reports are detailed, reliable, and easy to interpret, which greatly supports our validation and audit activities.

Integration into our CI/CD pipeline was straightforward and efficient. The tool fit seamlessly into our existing build and testing infrastructure, allowing us to automate coverage measurement without disrupting our workflow. In addition, the usability of Testwell CTC++ is very good. The setup process, reporting, and overall user experience are intuitive and well designed, making it easy for our team to adopt and use effectively.

We are very satisfied with Testwell CTC++ and look forward to continuing our collaboration in the future.
